

SAW Snow Climatology - April

Data is limited for observations with SE and SW winds.

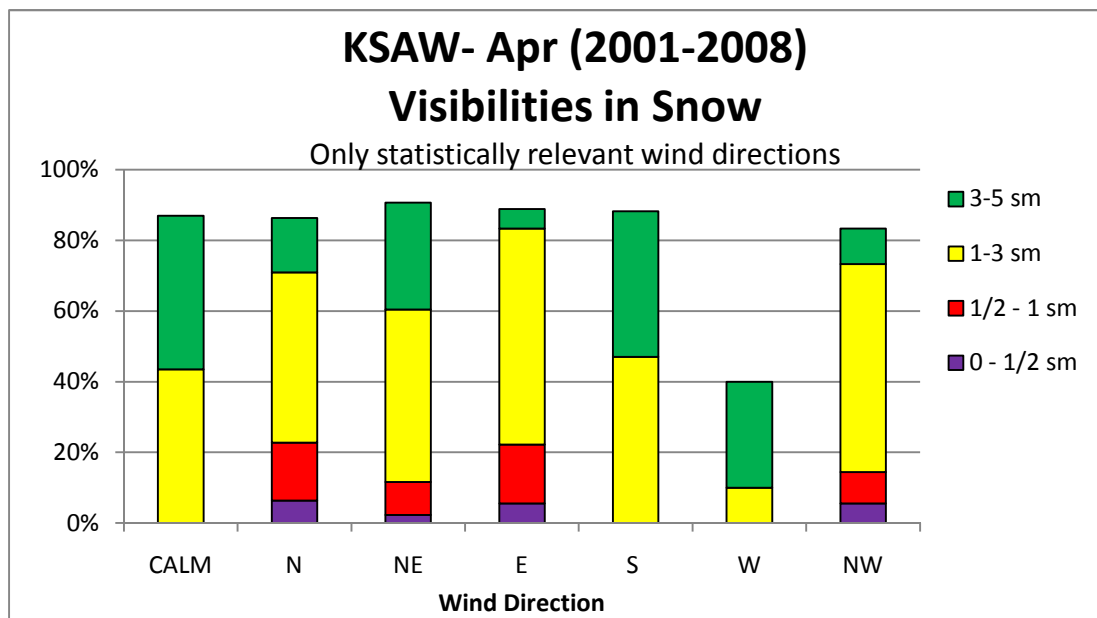

Ceilings:

Majority of ceilings IFR (500 - 1000 ft).

Exception: Observations with W or NW winds mainly low MVFR (1000 - 2000 ft).

Highest percentage of LIFR (200 - 500 ft) ceilings occurred with N winds.

Visibilities:

Majority of ceilings IFR (1 – 3 miles).

Exception: Observations with W winds mainly VFR (greater than 5 miles).

Highest percentage of VLIFR (less than ½ mile) and LIFR (½ mile or ¾ mile) visibilities occurred with N winds.

KSAW- Hourly Observations with Snow April (2001-2008)
